## EXPERIENCE

### **Software Engineer, Facebook; London, UK 2018 Present**

At Facebook I work on building apps and services with more than **2 Billion monthly active user**. We give people the power to build community and bring the world closer together.

I am currently focused on bringing **Portal** to the Workplace, and providing the best possible communication and collaboration device to remote workers and SMBs.

### **Mobile Software Engineer, Netcetera; Skopje, Macedonia 2014 2017**

At Netcetera I led a team of 5 engineers in building a Mobile Banking Product which served as a core component around which we developed 50 other mobile applications for Swiss banks.

This was a long-running project, and my focus on security, stability and modularity had a positive impact on the efficiency of development and deployment of the product.

### **Android Engineer, Freelance; Multiple Locations 2013 2018**

As a Freelance Mobile Developer I had the chance to work on projects in more than 6 different industries with smart people from all over the world.

I developed an interactive live gameplay streaming application which was acquired by Microsoft, worked on mobile apps in the government and education sector, and also built an innovative mobile software-defined-network stack for one of the biggest network operators in the US.

## EDUCATION

University St. Cyril & Methodius, Skopje, Macedonia — Bachelor of Science, 2015

## SKILLS

One of my strengths lies in my ability to convey information in an understandable and concise manner. This has proved to be very effective in many XFN collaborations I've had between teams and individuals. I love working closely with my team, designing and brainstorming complex solutions, and solving problems for millions of users globally.

I have an expert understanding in Android application development, and set a high bar for code quality and cleanliness.
